Frontend Developer with experience in full stack development, focused on creating scalable, responsive user interfaces and seamless API integrations. Recognized for attention to detail, adaptability, and resilience, with a strong drive to deliver impactful digital products that converts.

WORK EXPERIENCE

Frontend Developer

Finezcv, Lagos, Jun 2023 - Present

- Built responsive and accessible UI for the web app using React, TypeScript, and Tailwind CSS, ensuring seamless user experience across all screen sizes.
- Implemented user authentication with Auth.js, JWT strategy, and OAuth integrations for Google and LinkedIn logins.
- Integrated external AI services via REST API for generating content, and implemented Grammarly Editor SDK to provide real

   time grammar checks and AI writing assistance in the rich text editor
- Developed UI for Stripe payment integration using Stripe.js and integrated Flutterwave React SDK to support African payment gateways.
- Managed state, form validation, and data fetching using React Query, Redux Toolkit, and other React tools, ensuring consistent and efficient data handling.
- Optimized SEO performance for better visibility, contributing to growth from 0 to 10,000+ users in the first release cycle.

Frontend Developer(Web&Mobile)

Spree, Lagos, Apr 2023 - Mar 2025

- Developed UI screens, navigation flows, and reusable components using Expo, React Native, React, and TypeScript, ensuring pixel-perfect, responsive designs across devices.
- Implemented core features including authentication flows (OTP/PIN, Google/LinkedIn login), robust forms with react-hook-form + Zod, and secure storage with Expo Secure Store.
- Integrated APIs and enhanced UX with loading/error states, pull-to-refresh, push notifications, and offline caching using TanStack React Query v5, Axios, and NetInfo.
- I also designed and developed a high-converting landing page using Vue, Nuxt.js, TypeScript, and Tailwind CSS, optimized for performance and responsiveness.
- Applied SEO best practices and improved load times, boosting search visibility and organic reach.
- Increased app downloads by 70% through strategic design enhancements and optimized conversion funnels.

Frontend Developer

Obalatan High School, Ekiti, Feb 2024 - Jan 2025

- Designed and developed a web-based Computer Based Test (CBT) platform to help students prepare for national exams and internal assessments

- Created a secure login system that generated and assigned unique credentials for each student, ensuring personalized access and session tracking

- Collaborated with school administrators to manage test schedules and student data, ensuring the platform aligned with academic requirements and privacy standards.

- Implemented dynamic question rendering, timer functions, and instant scoring feed back to stimulate real CBT environments.
